INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Canadian Income & Growth Corporate Class (the Fund) is to provide a steady flow of current income while preserving capital by investing in a diversified portfolio of securities composed mainly of equity, equity-related and fixed income securities of Canadian issuers. The Fund may also invest in foreign securities.

It invests in units of the CI Canadian Income & Growth Fund (the Underlying Fund). To achieve the investment objective of the Fund, the portfolio advisor of the Underlying Fund invests in a combination of equity, fixed income and derivatives. The portfolio advisor will actively manage the equity, fixed income, and cash components of the Underlying Fund. The Underlying Fund is not limited to how much it invests in each asset class. This will vary according to market conditions. Equity securities include preferred and common shares broadly diversified by sector and style. Fixed income consists of high-yielding government and corporate bonds, debentures and bank loans and floating rate debt instruments. This may include securities that are unrated or have credit rating below investment grade. The term to maturity of these securities will vary depending on the portfolio advisor's outlook for interest rates. The Underlying Fund may also generate income by investing in real estate investment trusts, royalty trusts, income trusts and other similar high-yielding instruments. It is currently expected that investments in foreign securities will generally be no more than 49% of the Underlying Fund's assets.

The portfolio advisor will seek to produce additional income through covered call writing and other derivative strategies. The Underlying Fund may use derivatives, but only as permitted by securities regulations. In order to earn additional income, the Underlying Fund may also enter into securities lending transactions, repurchase transactions and reverse repurchase transactions, to the extent permitted by securities regulations.

For a complete discussion of the Fund's and the Underlying Fund's respective investment objective and strategies, please refer to the Fund's and the Underlying Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$61.4 million to \$485.2 million from March 31, 2022 to March 31, 2023. The Fund had net redemptions of \$15.7 million during the year. The portfolio's performance decreased assets by \$26.3 million. The Fund paid distributions totalling \$19.4 million. Series A shares returned -5.5% after fees and expenses for the one-year period ended March 31, 2023. Over the same time period, the Fund's benchmark returned -2.8%. The benchmark is a combination of the S&P/TSX Composite Total Return Index - 35%, the MSCI ACWI Total Return Index - 25%, the FTSE Canada Universe Bond Total Return Index - 20% and the ICE BofA U.S. High Yield Total Return Index (USD) - 20% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the CI Canadian Income & Growth Fund (Underlying Fund).

Over the year, authorities and financial markets continued to grapple with high inflation, which led most central banks around the world to significantly raise interest rates. This drove down the value of bonds and reduced stock market valuations and returns significantly. Economic growth was maintained, but a slowdown, with the potential for a recession in some regions, began to be expected sometime in 2023. Geopolitically, Russia's war against Ukraine heightened markets' perceptions of geopolitical risks, while the end of China's zero-COVID policy helped to provide a boost to global economic conditions. All of these global factors were on display in Canada, although a high level of savings buffered the economy somewhat, with more confidence that the Bank of Canada is likely nearing the end of its interest rate hiking cycle.

CI Canadian Income & Growth Corporate Class

Management Report of Fund Performance for the period/year ended March 31, 2023

The Underlying Fund underperformed its benchmark for the year. Currency hedging was a key detractor from the Underlying Fund's performance as the Canadian dollar weakened against the U.S. dollar. The Underlying Fund's underweight allocation to fixed income and overweight allocation to equities detracted from performance amid weaker equity markets late in the year. Underweight exposures to the consumer discretionary and information technology sectors also detracted from the Underlying Fund's performance. A holding in The Bank of Nova Scotia was another notable detractor from the Underlying Fund's performance, as concerns around loans heading into an economic slowdown and disappointing net interest margins weighted on the bank stock's performance.

Security selection within the Underlying Fund's fixed-income component contributed to performance. Within equities, stock selection within the materials and industrials sectors contributed to the Underlying Fund's performance. The largest individual contributor to the Underlying Fund's performance was a holding in Fairfax Financial Holdings Inc., after the company reported strong third-quarter 2022 results. The market began to recognize that the valuation discount the company has versus its peers was not justified given strong forecasts for higher interest and dividend income. A commitment to share buybacks also played a role in positive market sentiment for the company's shares.

We added new positions in TC Energy Corp., Quanta Services Inc., AltaGas Ltd. and AT&T Inc. to the Underlying Fund during the year and increased existing positions in WSP Global Inc. and The Toronto-Dominion Bank. We eliminated the Underlying Fund's holdings in Unity Software Inc., GSK PLC and NextEra Energy Inc. The Underlying Fund's holdings in Apple Inc. and Nutrien Ltd. were trimmed.

Overall, the Fund underperformed its benchmark for the year.

RECENT DEVELOPMENTS

Looking forward, we expect economic growth to moderate in most developed markets, though we do not expect a deep recession. Inflation has remained persistent, although we are seeing signs that it should moderate in the medium term. It is expected that wage pressures are likely to continue as workers and consumers seek to achieve real wage growth against inflation. Overall, this speaks to a moderate outlook for market returns overall, with valuation expansion and corporate earnings growth both likely to be elusive. While interest rate increases are likely to moderate, economic and inflationary conditions are unlikely to lead to large-scale interest rate cuts that would propel bonds to significant returns.

Given this backdrop, the Underlying Fund has a moderately overweight allocation to equities, with a tilt toward value-oriented sectors, such as financials and energy. Consistent with this bias toward value, the Underlying Fund has an overweight exposure to Canadian equities. While bank turmoil in the United States in March 2023 caused a flight away from financials, we see this as a contained episode and have been adding to the Underlying Fund's exposure to high-quality financial companies.

The Underlying Fund's fixed-income allocation was increased substantially over the year, in both government and corporate bonds, but remains an underweight allocation. We see fixed income as likely to be a positive contributor over the coming period with higher yields, particularly in high-quality corporate instruments, providing the potential for capital gains if interest rate cuts happen.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
