INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of Sentry Growth Portfolio (the Fund) is to provide long-term capital appreciation and the potential for current income by investing in an actively managed, diversified portfolio of primarily global equity and, to a lesser extent, fixed-income securities of companies, either directly or indirectly, of all capitalizations, including those involved in the real estate, infrastructure, energy and materials sectors. The equity component will range between 70 - 100% of the Fund's portfolio, while the fixed-income component will range between 0 - 30%. The fixed-income portion of the portfolio will include directly or indirect investment in a combination of primarily high-yield fixed-income securities and, to a lesser extent, investment-grade fixed-income securities of any type and will maintain an average credit rating of B or higher. The Fund may invest up to all of the Fund's assets in securities of other mutual funds, including those managed by the Manager and may invest up to all of its assets in foreign securities. For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The net asset value of the Fund decreased by \$19.9 million to \$71.2 million from March 31, 2018 to March 31, 2019. The Fund had net redemptions of \$21.3 million during the year. The portfolio's performance increased assets by \$2.0 million. The Fund paid distributions totalling \$0.6 million. Series A units returned 2.3% after fees and expenses for the one-year period ended March 31, 2019. Over the same time period, the Fund's benchmark returned 7.8%. The benchmark is a combination of the MSCI World Total Return Index - 80% and the FTSE Canada Universe Bond Total Return Index - 20%.

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the underlying funds.

During the year, strong U.S. economic growth helped to offset weakness in Europe and China. The U.S. Federal Reserve raised short-term interest rates by 100 basis points, while the Bank of Canada raised its rate by 75 basis points. The United States imposed tariffs on Canada, China and other trading partners, which resulted in reciprocal tariffs. Volatility within the financial markets increased significantly during the second half of the year.

The Fund underperformed its benchmark during the year. Exposure to credit and security selection within the Fund's fixed-income component contributed to its performance. The top individual contributor to performance was a J.P. Morgan Chase & Co. floating rate bond. The hybrid bond issued by this large U.S. bank has its interest payments tied to the U.S. dollar London interbank offered rate (LIBOR), and as the LIBOR rose substantially during the year, the bond performed well.

Stock selection within the Fund's U.S. equity component detracted from its performance. The largest individual detractor from performance was an equity holding in International Game Technology PLC, a vertically integrated player in digital gaming. The company was negatively impacted by issues in its European business.

We increased the Fund's hedge against the U.S. dollar to a neutral level to reduce volatility stemming from the foreign exchange market.

RECENT DEVELOPMENTS

We believe the Canadian economy will grow a little below its trend in 2019, but that the risk of recession is low. We expect that if the Bank of Canada raises interest rates again in 2019 by 25 basis points, it will likely be late in the calendar year. The Fund will maintain an overweight exposure to credit, and a modestly short duration (interest rate sensitivity) with a significant underweight exposure to the short end of the yield curve.

We have an optimistic outlook for the coming year. The North American economy is expected to show positive growth and we believe that the companies held in the Fund should generate rising free cash flows and deliver growing dividends. There should also be an easing of trade hostility between the United States and China.

While the outlook is positive, we will take a relatively defensive approach to stock selection. Areas of focus will be companies that have low debt levels and the ability to deliver steadily growing cash flows. We also favour companies that have exposure to a faster-growing U.S. economy.

New Accounting Standard – IFRS 9

Effective April 1, 2018, the Fund retrospectively without restatement adopted IFRS 9, *Financial Instruments* (IFRS 9). The new standard requires financial assets to be either carried at amortized cost or at fair value with changes in fair value recognized in profit and loss (FVTPL) or in other comprehensive income (FVOCI) based on the Fund's business model for managing financial assets and the contractual cash flow characteristics of the financial assets. Upon transition to IFRS 9, the Fund's financial assets and financial liabilities previously designated as FVTPL or classified as held for trading under IAS 39, *Financial Instruments: Recognition and Measurement* (IAS 39) continue to be classified as FVTPL under IFRS 9. There were no changes in the measurement attributes for any of the Fund's financial assets and financial liabilities upon transition to IFRS 9.

On June 1, 2018, Sentry Investments Inc. amalgamated with CI Investments Inc. (CI) and Sentry Investments Corp. After the amalgamation, members of the Independent Review Committee (IRC) of the CI family of funds also became members of the Sentry Funds' IRC (together, the CI Funds IRC). Previous members of the Sentry Funds' IRC resigned on May 31, 2018.

On September 1, 2018, the Administration Fee proposal that was approved by unitholders during a special meeting held on May 3, 2018 came into effect. Effective September 1, 2018, CI Investments Inc. bears all of the operating expenses of the Fund (other than taxes, borrowing costs and new governmental fees) in return for the Administration Fee. Further details about the Administration Fee can be found in the Fund's most recent simplified prospectus and annual information form or their amendments at www.sedar.com.

Effective September 20, 2018, Tom Eisenhauer became a member of the CI Funds' IRC, and effective October 15, 2018, Mary Robertson resigned as a member of the CI Funds' IRC.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal year. The higher a Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the year.

(5) This information is provided for the years ended March 31.
