## RESULTS OF OPERATIONS

The net asset value of the Select 60i40e Managed Portfolio Corporate Class (the Fund) decreased by \$23.9 million to \$455.0 million from March 31, 2019 to September 30, 2019. The Fund had net redemptions of \$31.3 million during the period. The portfolio's performance increased assets by \$15.9 million. The Fund paid distributions totalling \$8.5 million. Class A shares returned 3.0% after fees and expenses for the six-month period ended September 30, 2019. Over the same time period, the Fund's benchmark returned 4.1%. The benchmark is a combination of the FTSE Canada Universe Bond Total Return Index - 60%, the MSCI World Total Return Index - 20% and the S&P/TSX Composite Total Return Index - 20%.

The performance of the Fund's other classes is substantially similar to that of Class A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other classes, please refer to the "Past performance" section.

The following commentary pertains to the results of operations of the Underlying Funds.

During the period, global trade tensions, notably between the United States and China, impacted capital investment levels worldwide. The global economy weakened as a result of a drop in global trade. Global central banks began loosening monetary policy by either lowering interest rates or expanding their balance sheets. The U.S. Federal Reserve cut interest rates twice during the period, in both July and September 2019. Government bond yields dropped and commodity prices declined.

Within the equity portion, weak relative performance from the international equity portion detracted value. An overweight allocation to the Canadian equity portion added value. Our largest underweight exposure is in the financials sector and the positioning within the sector is more diversified than the benchmark. We had overweight exposure to defensive sectors, such as utilities and consumer staples, and were underweight in cyclical and interest-rate-sensitive sectors, such as energy and telecommunications services. Within the income portion, our diversified exposure to dividend paying equities and government bonds added relative value. Our core investment objectives remain preserving capital and outpacing inflation over a three-year period. We focus on careful portfolio construction and asset allocation, built on a foundation of government bonds for safety and income. Interest rate sensitivity is hedged by diversifying into other asset classes, such as gold bullion, corporate bonds and stocks. Within the corporate bond portion, we maintain a short term to maturity as we near the latter stages of the economic cycle, when credit defaults could become more frequent. Currency hedging added value as the U.S. dollar depreciated against the Canadian dollar. We continue to attempt to limit the effects of exchange rate fluctuations by maintaining our long-standing, partial hedge on the portfolio. The U.S. deficit and debt expansion are significant concerns, as we believe these will weaken the U.S. dollar. The portfolio's positioning provided strong downside protection during periods of volatility.

The Fund underperformed its benchmark for the period.

## RECENT DEVELOPMENTS

It is widely expected that central banks will continue to cut interest rates and increase money supply. Even if consumption does not grow, we believe it is possible for companies to grow their earnings through share buybacks and lower interest expense. Our view is that the demand for risky assets will also grow as the money supply grows, a trend we have seen in the last decade. We retain our position to overweight stocks strategically but adjust on a tactical basis for any dramatic shifts in policy or sentiments.

Effective July 22, 2019, the risk rating for the Fund changed from "Low to Medium" to "Low". This change is the result of an annual review to comply with the methodology mandated by the Canadian Securities Administrators and is not the result of any changes to investment objective, strategies or management of the Fund.

Effective after the close of business on August 2, 2019, the classes of the Fund that were eligible for CI Preferred Pricing Program (CIPP) transitioned from a tiered pricing model to a fee rebate model.

Effective September 19, 2019, James McPhedran became a member of the Independent Review Committee (IRC) of CI Funds and effective August 15, 2019, John Reucassel resigned as a member of the IRC of CI Funds.

## **FINANCIAL HIGHLIGHTS (cont'd)**

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period.

(5) This information is provided for the period ended September 30, 2019 and the years ended March 31.

## PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that dividends made by the Fund in the periods shown were reinvested in additional shares of the relevant classes of the Fund. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

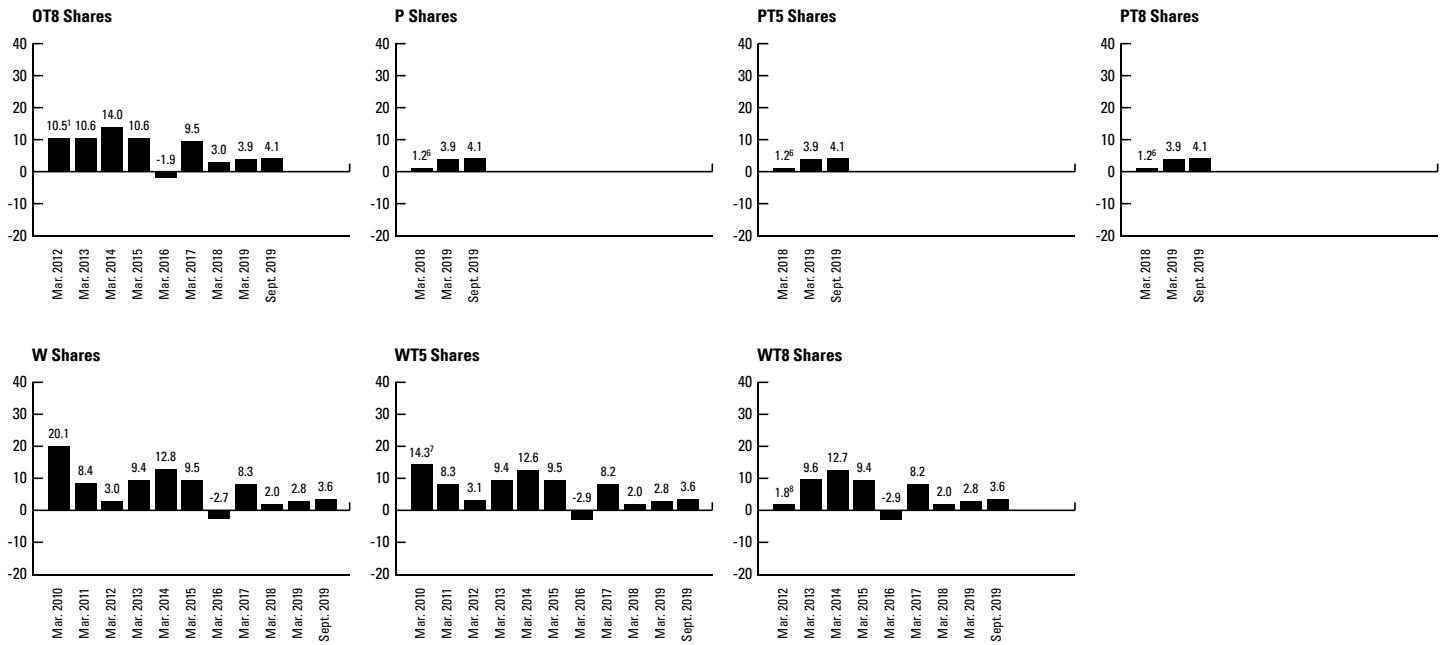

### Year-by-Year Returns

The following charts show the Fund's semi-annual and annual performance for each of the periods shown and illustrate how the Fund's performance has changed from period to period. In percentage terms, the charts show how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period, except where noted.
