Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

## RESULTS OF OPERATIONS

The net asset value of the Fund decreased by \$1.6 million to \$133.5 million from March 31, 2018 to September 30, 2018. The Fund had net redemptions of \$4.6 million during the period. The portfolio's performance increased assets by \$4.7 million. The Fund paid distributions totalling \$1.7 million. Class A shares returned 3.2% after fees and expenses for the six-month period ended September 30, 2018. Over the same time period, the Fund's benchmark returned 7.5%. The benchmark is a combination of the S&P/TSX Composite Total Return Index - 40% and the MSCI World Total Return Index - 30% in C\$ and 30% in local currency.

The performance of the Fund's other classes is substantially similar to that of Class A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other classes, please refer to the "Past performance" section.

The following commentary pertains to the results of operations of the underlying funds.

Global equity markets were generally flat to slightly positive over the period with the U.S. market being the only strong performer. This is part of an ongoing pattern since the beginning of the year, whereby the global economy is no longer synchronized the way it was in 2017. The U.S. economy continues to accelerate while the rest of the world is decelerating. While Europe experienced a slowdown, its economy remains resilient. Emerging markets were a more mixed picture with some countries decelerating more meaningfully than others. These differences were well reflected in stock market returns.

In Canadian dollar terms, the S&P 500 Index was up 11.9% for the period, while the S&P/TSX Composite Index was up 6.2%. The MSCI Emerging Markets Index was down 8.4%. Such is the fiscal impact of U.S. tax cuts for corporations and individuals. It has also provided a confidence boost to consumers in the U.S. generally where consumer confidence is at levels not seen since 2000. Unemployment is at generational lows below 2% and salaries are growing just above 2%.

The strong U.S. economic position also helped the U.S. dollar against most major currencies during the period but the positive correlation between the dollar and superior U.S. growth and higher U.S. rate differentials appears to be weakening.

Poor performance in the U.S. and Canadian equity pools detracted value. The portfolio's overall asset allocation made a positive contribution, due largely to an underweight position in Canadian equities. Our equity allocation is more diversified than that of the Canadian economy and the S&P/TSX Composite Index. Our largest underweight exposure is in the financials sector and the positioning within the sector is more diversified than the benchmark. We had overweight exposure to defensive sectors, such as health care and consumer staples, and were underweight in cyclical and interest-rate-sensitive sectors such as energy and telecommunications services.

We continue to use derivatives to help manage the risk of stock market decline. Specifically, we held a market hedge through S&P 500 derivatives to limit portfolio volatility. This hedge remains in place and will be removed only when the risk-return trade-off becomes favourable.

The Fund underperformed its benchmark for the period.

## RECENT DEVELOPMENTS

A strong U.S. economy is keeping the Federal Reserve on track to increase interest rates, which is putting upward pressure on the U.S. dollar. While the U.S. is capable of absorbing higher interest rates, the rest of the world is having more difficulty because of the quantity of U.S.-dollar debt issued by corporations around the world in the past several years.

Although the growth outlook remains constructive in major economies, particularly in the U.S., we note downside risks as global markets adjust to the reversal of accommodative financial conditions that have been in place for the last decade. As such, we stand ready to manage these risks.

Effective September 20, 2018, Tom Eisenhauer became a member of the Board of Governors ("BOG") and Independent Review Committee ("IRC"), and effective October 15, 2018, Mary Robertson resigned as a member of the BOG and IRC.

## RELATED PARTY TRANSACTIONS

### Manager, Portfolio Advisor and Registrar

CI Investments Inc. is the Manager, Portfolio Advisor and Registrar of the Fund. CI Investments Inc. is a subsidiary of CI Financial Corp. ## Management Fees

Approximately 26% of total management fees were used to pay for sales and trailing commissions. The remaining 74% of management fees were used for investment management and other general administration.

## Independent Review Committee

The Fund received standing instructions from the Fund's Independent Review Committee with respect to the following related party transactions:

- trades in securities of CI Financial Corp.;
- purchases or sales of securities of an issuer from or to another investment fund managed by the Manager; and
- purchases or sales of other investment funds managed by the Manager or their affiliates.

The applicable standing instructions require that related party transactions be conducted in accordance with the Manager's policies and procedures and that the Manager advise the IRC of any material breach of a condition of the standing instructions. The standing instructions require, among other things, that investment decisions in respect of related party transactions (a) are free from any influence by an entity related to the Manager and without taking into account any consideration relevant to an entity related to the Manager; (b) represent the business judgment of the Manager uninfluenced by considerations other than the best interests of the Fund; (c) are made in compliance with the Manager's policies and procedures; and (d) achieve a fair and reasonable result for the Fund. Transactions made by the Manager under the standing instructions are subsequently reviewed by the IRC on a quarterly basis to monitor compliance.

The Fund relied on the IRC's standing instructions regarding related party transactions during this reporting period.

Except as otherwise noted above, the Fund was not a party to any related party transactions during the period ended September 30, 2018.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Net assets per share and dividends per share are based on the actual number of shares outstanding for the relevant class at the relevant time. The increase (decrease) in net assets from operations per share is based on the weighted average number of shares outstanding for the relevant class over the fiscal period.

(3) Dividends are automatically reinvested in additional shares of the Fund.

(4) This information is provided for the period ended September 30, 2018 and the years ended March 31.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period.

(5) This information is provided for the period ended September 30, 2018 and the years ended March 31.

## PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that dividends made by the Fund in the periods shown were reinvested in additional shares of the relevant classes of the Fund. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

### Year-by-Year Returns

The following charts show the Fund's semi-annual and annual performance for each of the periods shown and illustrate how the Fund's performance has changed from period to period. In percentage terms, the charts show how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period, except where noted.
