## INVESTMENT OBJECTIVE AND STRATEGIES

The objective of the Select 60i40e Managed Portfolio Corporate Class (the Fund) is to provide returns from a diversified portfolio split between income and equity securities, designed for steady, long-term growth. It aims to invest 60% of its assets in mutual funds that invest primarily in income securities and 40% of its assets in mutual funds that invest primarily in equity securities.

In order to achieve its objective, the Fund's assets are diversified by investment style, asset class, and geographic region, and the portfolio advisor intends to invest approximately 60% of the Fund's assets in units of a combination of CI Income Fund and Signature Global Bond Fund, and approximately 40% in a combination of Select Canadian Equity Managed Fund, Select U.S. Equity Managed Fund and Select International Equity Managed Fund (collectively the "underlying funds").

## RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

## RESULTS OF OPERATIONS

The net asset value of the Fund decreased by \$87.5 million to \$478.9 million from March 31, 2018 to March 31, 2019. The Fund had net redemptions of \$84.5 million during the year. The portfolio's performance increased assets by \$12.2 million. The Fund paid distributions totalling \$15.2 million. Class A shares returned 1.7% after fees and expenses for the one-year period ended March 31, 2019. Over the same time period, the Fund's benchmark returned 6.7%. The benchmark is a combination of the FTSE Canada Universe Bond Total Return Index - 60%, the MSCI World Total Return Index - 20% and the S&P/TSX Composite Total Return Index - 20%.

The performance of the Fund's other classes is substantially similar to that of Class A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other classes, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the underlying funds.

During the year, there were several key indicators that signalled potentially negative changes in the Canadian economy. These included a decline in real estate investment, weaker retail sales and increased volatility in the stock market. The Bank of Canada (BoC) increased its overnight rate twice during the period, from 1.25% to 1.75%. The BoC also signalled the potential for future interest rate cuts as a result of projections of weaker

economic performance in the months ahead. The Canadian dollar weakened against the U.S. dollar. The yield curve in Canada inverted towards the end of the year.

In the U.S., tighter financial conditions helped to push yields up (and valuations down) during the year. U.S. tax cuts aided equity performance. The U.S. Federal Reserve (Fed) raised interest rates three times, with the federal funds rate moving up from 2.25% to 2.75%. Global equity markets later took their cue from a shift in monetary policy from the Fed and other central banks at the end of the year, signalling a pause on interest rate increases.

European economies, Germany and France in particular, slowed as a result of uncertainty over the potential impact of the United Kingdom's exit from the European Union (EU). The U.K.'s exit deal from the EU faced significant challenges during the year, as many lawmakers signalled they would not support Prime Minister Theresa May's withdrawal agreement. Weaker economic data, trade policy uncertainty, political divisiveness and a strong U.S. dollar contributed to significant underperformance of global equity markets. The deceleration in the developed economies outside of the United States, including China, was more pronounced in the latter part of the year.

Within the equity portion, weak relative performance from the Canadian and U.S. equity portions detracted value. Strong relative performance from the international equity portion added value. Our largest underweight exposure is in the financials sector and the positioning within the sector is more diversified than the benchmark. We had overweight exposure to defensive sectors, such as utilities and consumer staples, and were underweight in cyclical and interest-rate-sensitive sectors, such as energy and telecommunications services. We implemented a derivatives strategy to help manage the risk of stock market decline. Specifically, we held a market hedge through S&P 500 derivatives to limit portfolio volatility. This hedge has been removed as the risk-return trade-off is no longer favourable. Within the income portion, our diversified exposure to dividend-paying equities and corporate bonds added relative value.

We focus on careful portfolio construction and asset allocation, built on a foundation of government bonds for safety and income. Interest rate sensitivity is hedged by diversifying into other asset classes, such as gold bullion, corporate bonds and stocks. Within the corporate bond portion, we maintain a short term to maturity as we near the latter stages of the economic cycle, when credit defaults could become more frequent. Currency hedging detracted over the year as the U.S. dollar appreciated against the Canadian dollar. We continue to attempt to limit the effects of exchange rate fluctuations by maintaining our long-standing, partial hedge on the portfolio. The U.S. deficit and debt expansion are significant concerns, as we believe these will weaken the U.S. dollar. The portfolio's positioning provided strong downside protection during periods of volatility.

The Fund underperformed its benchmark for the year.

## RECENT DEVELOPMENTS

An economic slowdown in Canada is likely given the impact of low crude oil prices. Heavily indebted consumers are weighing on consumer and real estate spending. On the positive side, Canadian jobs grew by 219,000 during the year. Higher job rates are good for consumer spending, which has been slowing as interest rates rise and many pay down their debts.

U.S. financial markets are vulnerable to investor concerns that an economic downturn is near, even as the actual risk of a U.S. recession is likely low in 2019.

Global economic growth is expected to slow next year, amid uncertainties around China's economic growth and unstable European politics. Global earnings growth is also set to moderate in 2019, tracking the more subdued growth outlook.

### New Accounting Standard – IFRS 9

Effective April 1, 2018, the Fund retrospectively without restatement adopted IFRS 9, *Financial Instruments* (IFRS 9). The new standard requires financial assets to be either carried at amortized cost or at fair value with changes in fair value recognized in profit and loss (FVTPL) or in other comprehensive income (FVOCI) based on the Fund's business model for managing financial assets and the contractual cash flow characteristics of the financial assets. Upon transition to IFRS 9, the Fund's financial assets and financial liabilities previously designated as FVTPL or classified as held for trading under IAS 39, *Financial Instruments: Recognition and Measurement* (IAS 39) continue to be classified as FVTPL under IFRS 9. There were no changes in the measurement attributes for any of the Fund's financial assets and financial liabilities upon transition to IFRS 9.

Effective September 20, 2018, Tom Eisenhauer became a member of the Independent Review Committee (IRC) and effective October 15, 2018, Mary Robertson resigned as a member of the IRC.

## **FINANCIAL HIGHLIGHTS (cont'd)**

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal year. The higher a Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the year.

(5) This information is provided for the years ended March 31.

## PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that dividends made by the Fund in the years shown were reinvested in additional shares of the relevant classes of the Fund. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

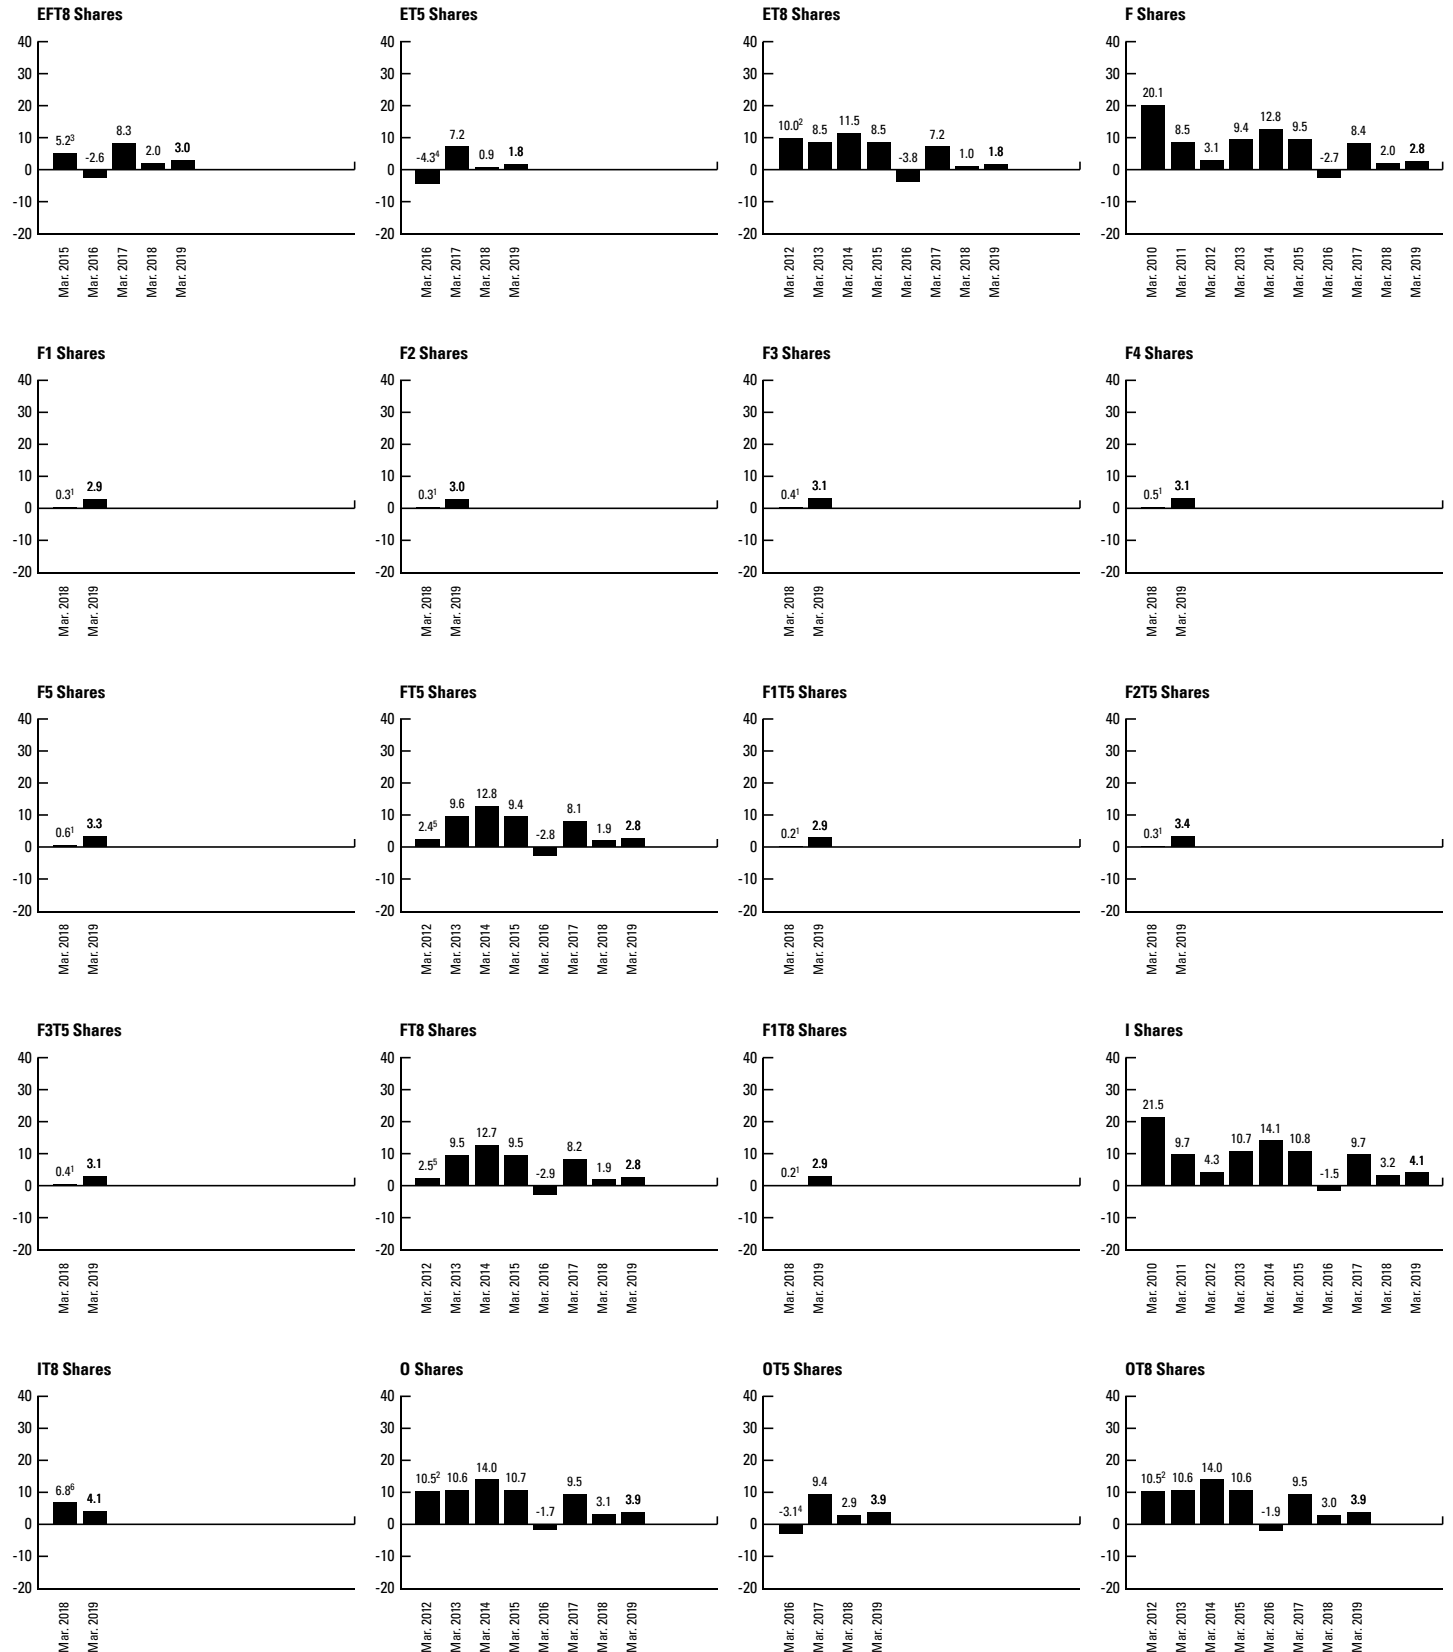

### Year-by-Year Returns

The following charts show the Fund's annual performance for each of the years shown and illustrate how the Fund's performance has changed from year to year. In percentage terms, the charts show how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year, except where noted.
