#### **RESULTS OF OPERATIONS**

The net asset value of the Signature Diversified Yield Corporate Class (the Fund) decreased by \$10.3 million to \$423.0 million from March 31, 2019 to September 30, 2019. The Fund had net redemptions of \$19.5 million during the period. The portfolio's performance increased assets by \$19.1 million. The Fund paid distributions totalling \$9.9 million. Class A shares returned 4.0% after fees and expenses for the six-month period ended September 30, 2019. Over the same time period, the Fund's benchmark returned 3.4%. The benchmark is a combination of the ICE BofAML U.S. High Yield Total Return Index - 40%, the MSCI ACWI Global High Dividend Yield Total Return Index - 20%, the MSCI ACWI Infrastructure Total Return Index - 20% and the MSCI World Real Estate Total Return Index - 20%.

The performance of the Fund's other classes is substantially similar to that of Class A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other classes, please refer to the "Past performance" section.

The three-year synchronized global policy-driven upswing in asset prices showed signs of stalling over the past six months. Slowing Chinese growth in particular, exacerbated by domestic credit issues and prolonged U.S.-China trade tensions, is spilling into Europe and emerging markets. Corporate confidence in those geographies plus North America has begun to erode, and management teams are deferring capital investments. Employment levels are strong and wage gains are beginning to gain traction, although other measures of inflation are slipping. As a result, U.S. Federal Reserve (Fed) cuts in interest rates in July and September 2019 – the first interest-rate cuts in 10 years – were characterized as a "mid-cycle adjustment." So far, economic data is supporting the view of lower but still positive economic growth, and the markets are not panicking. Credit conditions remain supportive, although other funding channels, such as the "unicorn" initial public offerings of Uber Technologies Inc. and other tech companies, seem appropriately more discerning. Income asset classes benefited from the fall in global bond yields with year-to-date market index returns in double-digit territory.

The Fund outperformed its blended benchmark for the six-month period ended September 30, 2019, on good security selection. Sector positioning within credit and equities was generally a positive contributor to the Fund's active returns, although the Fund's allocation to the global financials sector was a detractor. Global banks sold off during the reporting period as bond yields fell, pressuring net interest margins going forward.

The strength in fundraising continued for Brookfield Asset Management Inc. with another healthy increase in assets for the reporting period. Large institutions continue to increase their allocations to alternative asset class, and Brookfield Asset Management continues to be the dominant player in this realm.

Continuing solid performance in Ferrovial S.A.'s key toll-road and transportation businesses (Highway 407 in Ontario, Heathrow airport and Texas toll roads) helped create a positive view of Ferrovial in the markets over the period. Additionally, news that the company was likely to sell off its services business, which has historically restrained the company's margins and has impairments, contributed to improved market focus on Ferrovial's core infrastructure assets.

Despite ongoing operational improvements, announcements of accretive expansions and of a share buyback, Cheniere Energy, Inc. detracted from the Fund's performance. Market concerns around Asian liquid natural gas prices, as well as U.S.-China trade fears and the broader energy tape were key contributors to selling pressure on Cheniere shares.

The Fund's holding in Rayonier Advanced Materials Inc. 5.5% bonds due 2024 was another detractor from performance. Rayonier Advanced Materials, a North American-based producer of specialty pulp products, recently merged with Tembec Inc., a Canada-based competitor, and assumed incremental leverage in order to do so. Results for the acquired business have not been what the company or investors had expected, and Rayonier Advanced Materials management has flagged that a covenant breach on the merger was possible.

During the period, we added Brookfield Property REIT Inc. 5.75% bonds due 2026 to the Fund's portfolio. Brookfield Property REIT and MGM Growth Properties LLC own the underlying gaming and hotel assets of MGM Resorts International.

The Fund's holding in Citigroup Inc. was sold during the period as we rotated into the more diversified assets of CI First Asset Global Financial Sector ETF. We also sold numerous Gibson Energy Inc. bonds as they were upgraded to investment-grade and their yields fell.

#### RECENT DEVELOPMENTS

Accommodative monetary policy by central banks globally should be supportive of credit conditions, and our base case is underlying business resilience, consumer balance-sheet health and the Fed proactively cutting interest rates should be sufficient to keep economic growth low but positive. Nonetheless, corporate and investor belief that the economy is in the late stage of a business cycle and that recession is around the corner risks being self-fulfilling. Central bankers are beginning to realize the potency of monetary policy is muted when interest rates are closer to zero-bound but with increased adverse side effects in the currency markets and in trade relationships. While disappointing but positive economic growth is our base case, absent renewed optimism subsequent to a U.S.-China trade deal, a hand-off to government fiscal stimulus may be required to spark confidence and inflation. As always, we will monitor closely corporate earnings and sentiment, but for the time being, at the margin we have become more cautious in our security selection and slightly more defensive in our asset allocation.

Management Report of Fund Performance for the period ended September 30, 2019

<sup>(1)</sup> This information is derived from the Fund's semi-annual and annual financial statements.

(5) This information is provided for the period ended September 30, 2019 and the years ended March 31.

<sup>(2)</sup> Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

<sup>(3)</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

<sup>(4)</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period.
