RESULTS OF OPERATIONS

The net asset value of the Fund increased by \$9.7 million to \$564.9 million from March 31, 2018 to September 30, 2018. The Fund had net redemptions of \$22.7 million during the period. The portfolio's performance increased assets by \$32.4 million. Class A units returned 5.8% after fees and expenses for the six-month period ended September 30, 2018. Over the same time period, the Fund's benchmark returned 6.2%. The benchmark is the S&P/TSX Composite Total Return Index.

The performance of the Fund's other classes is substantially similar to that of Class A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other classes, please refer to the "Past Performance" section.

During the period, rising global trade tensions continued to concern investors. The North American Free Trade Agreement (NAFTA) was replaced with the United States-Mexico-Canada Agreement (USMCA) after an agreement was reached before the October 1 deadline. The United States imposed tariffs on US\$200 billion worth of Chinese imports. The initial tariffs were set at 10%, rising to 25% by year end.

With these new tariffs now in place, Morgan Stanley estimates that the United States has implemented tariffs on approximately 4.1% of imports, ranging from steel and aluminum, to washing machines and solar panels. This resulted in deteriorating relations between the United States and China and concerns that the trade dispute could spill over into broader geopolitical relations between the two countries.

As the tariffs have the potential to disrupt global trade flows, they have also put focus on U.S. domestic inflationary pressures. Inflation rates have risen in Canada, the United States and globally since 2015. Over the past year, the consumer price index was up 2.8% in Canada and 2.7% in the United States.

The Fund underperformed its benchmark for the period.

Security selection contributed to performance, particularly within the information technology sector. An underweight allocation to the materials sector was another contributor to performance. Individual contributors to performance included positions in Wix.com Ltd. and TFI International Inc. Wix.com recently launched Wix Code, a website-building tool that significantly expands the company's market. Wix.com posted strong results and continued to execute well. TFI International benefited from strong transportation fundamentals during the period. Given the strong economic backdrop, volume and pricing have been robust, which should translate into strong revenue and cash flows for the company.

The Fund's cash allocation detracted from performance, as did security selection within the energy sector. Individual detractors from performance included Premium Brands Holdings Corp. and BK Brasil S.A. Premium Brands was negatively impacted by

challenges in Western Canada, as organic demand growth has begun to slow, making the company more dependent on acquisitions to support its future growth. BK Brasil reported weaker-than-expected second-quarter results, with flat same-store sales, which were affected by the FIFA World Cup and the truckers' strike in Brazil.

We purchased new positions in NuVista Energy Ltd., Knight-Swift Transportation Holdings Inc. and LendingTree Inc. during the period. Holdings in Melrose Industries PLC and Domino's Pizza Enterprises Ltd. were eliminated.

RECENT DEVELOPMENTS

With short-term interest rates rising, we will closely monitor leading indicators for signs that the global economy may be softening. We continue to focus on finding high-quality companies with identifiable competitive advantages at attractive prices. When evaluating the merits of a business, we look at a broad range of scenarios to help prepare for any potential volatility.

Effective September 20, 2018, Tom Eisenhauer became a member of the Board of Governors ("BOG") and Independent Review Committee ("IRC"), and effective October 15, 2018, Mary Robertson resigned as a member of the BOG and IRC.

The applicable standing instructions require that related party transactions be conducted in accordance with the Manager's policies and procedures and that the Manager advise the IRC of any material breach of a condition of the standing instructions. The standing instructions require, among other things, that investment decisions in respect of related party transactions (a) are free from any influence by an entity related to the Manager and without taking into account any consideration relevant to an entity related to the Manager; (b) represent the business judgment of the Manager uninfluenced by considerations other than the best interests of the Fund; (c) are made in compliance with the Manager's policies and procedures; and (d) achieve a fair and reasonable result for the Fund. Transactions made by the Manager under the standing instructions are subsequently reviewed by the IRC on a quarterly basis to monitor compliance.

FINANCIAL HIGHLIGHTS (cont'd)

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period.

(5) This information is provided for the period ended September 30, 2018 and the years ended March 31.

Year-by-Year Returns

The following charts show the Fund's semi-annual and annual performance for each of the periods shown and illustrate how the Fund's performance has changed from period to period.
