INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Global High Dividend Advantage Fund (the Fund) is generate a consistently high level of dividend and interest income while preserving capital by investing, directly or indirectly, primarily in dividend-paying common and preferred shares, debentures, income trusts, equity-related securities and convertible securities of issuers anywhere in the world. Indirect investments can include derivatives and investments in other mutual funds.

The portfolio advisor identifies companies that offer good value relative to its current price and how it is expected to perform.

The portfolio advisor uses techniques such as fundamental analysis to assess value and growth potential. This means evaluating the financial condition and management of a company, its industry and the overall economy. The portfolio advisor analyzes financial data, assesses the quality of management, and conducts company interviews.

The Fund may use derivatives to the extent permitted by securities regulations. In order to earn additional income, the Fund may also enter into securities lending transactions, repurchase transactions and reverse repurchase transactions, as permitted by securities regulations. The Fund may hold cash, or invest excess cash in any Canadian or U.S. dollar denominated debt security considered investment grade, and cash equivalents. The Fund may also invest in exchange traded funds and closed-end funds.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The net asset value of the Fund decreased by \$74.0 million to \$264.3 million from March 31, 2019 to March 31, 2020. The Fund had net redemptions of \$5.3 million during the year. The portfolio's performance decreased assets by \$49.5 million. The Fund paid distributions totalling \$19.2 million. Class A units returned -17.3% after fees and expenses for the one-year period ended March 31, 2020. Over the same time period, the Fund's benchmark returned -6.5%. The benchmark is the MSCI ACWI Total Return Index (the Benchmark).

The performance of the Fund's other classes is substantially similar to that of Class A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other classes, please refer to the "Past Performance" section.

The reporting year began with stocks rebounding from the deep selloff in the fourth quarter of 2018. The turnaround was supported by the view that while the global economy was slowing, it would not slip into recession. Accommodative central banks also provided a lift as they backed away from normalizing monetary policies.

The COVID-19 outbreak became a global pandemic. Stocks tumbled swiftly into a bear market, with some markets reporting their worst quarter in decades. The longest bull market in U.S. history ended abruptly with the fastest-arriving bear market ever. Equity markets then crumbled in February as it became evident the virus was not contained within China and that governments would voluntarily shut down their economies to slow its spread – an unprecedented event.

Central banks provided liquidity while acknowledging that monetary policy had its limits and that fiscal policy needed to be more supportive. The U.S. Federal Reserve (Fed) cut short-term rates to zero and provided other forms of liquidity to keep credit markets functioning. The precipitous drop in stock prices continued unabated, however, until the Fed announced unlimited purchases of Treasury bonds while Congress appeared on track to pass a massive \$2 trillion spending bill.

It has been a challenging year for the strategy and the Fund underperformed its benchmark. The Fund participated in the strong start to the year; however, much of the broader market returns were driven by continued excitement in technology and ecommerce stocks outside of our investable universe and the Fund lagged the market.

The Fund has not been immune to the indiscriminate market sell-off as a result of the coronavirus pandemic. While all sectors detracted from absolute performance, financials followed by energy were the largest detractors. Historically, the strategy has offered strong downside protection when markets sell-off, but so far that has not been the case during the fastest-arriving bear market in history, as typically defensive sectors have not held up as strongly as in the past and dividend-paying companies have been out of favor with investors. Information technology was one of the Fund's main detractors to relative returns. Stock selection in real estate was another main detractor, as the continued shutdowns fuelled concern for commercial real estate.

CI Global High Dividend Advantage Fund

A few positions were initiated during the year, including Novo Nordisk and CME Group. Novo Nordisk is a Denmark-based pharmaceutical company specializing in diabetes care. Cash flow growth drivers include global diabetes market growth and continued rapid expansion of Novo's market-leading GLP-1 (glucagon-like peptide) diabetes franchise. Lower capital expenditures should also contribute to higher free cash flow production as the company recently completed a large expansion of its global manufacturing capacity. Novo Nordisk returns cash to shareholders through a growing dividend, which is well covered by free cash flow, and regular share repurchases. CME Group operates exchanges for the trading of futures and options on commodities and financial instruments. CME enjoys significant scale and a robust market position, allowing it to prosper in a wide variety of market environments. The company maintains a strong franchise with earnings and cash flow growth driven by continued demand for futures and options as vehicles for hedging and speculation, continued introduction of innovative new contracts and geographic expansion. The company pays an attractive, growing dividend that is well covered by earnings, and also pays a variable "5th dividend" each December based on excess cash flow.

A few positions were closed during the year, including Simon Property Group and Royal Dutch Shell. Simon Property Group (SPG) owns, develops, and manages shopping malls, primarily in the U.S. Prior to COVID-19, our view was that SPG would succeed in a challenging retail environment because of its portfolio of high-end malls and discount outlets, broad geographic diversification, successful implementation of the strategy to expand tenant rosters beyond retail stores, low leverage, and strong management track record. In light of the unprecedented measures taken around the world to limit social interaction, and the consequent impact on retailers forced to close immediately and indefinitely, we decided to exit Simon Property Group. Lack of visibility around the impact on rental income as many tenants are expected to seek rent relief from landlords made the near-term outlook for the dividend uncertain. Royal Dutch Shell is a global integrated energy company that explores, produces and markets crude oil and natural gas. Shares declined along with other integrated oil companies as the energy sector experienced double shocks from supply and demand dislocations, caused by OPEC+ and COVID-19 respectively. With a weakened balance sheet, measured by net debt leverage or gearing, we became concerned about Shell's ability to maintain its dividend in a prolonged down cycle.

RECENT DEVELOPMENTS

Our outlook has changed dramatically since the beginning of the year and will likely continue to shift. Given this challenging market environment, we expect dividends to be less robust than they were during the Great Financial Crisis. It is important to note, however, that some companies will continue to generate material cash flows in the current environment while others might have entered this year with ample liquidity and/or have the balance sheet capacity to sustain the distributions during a temporary hit to demand. We are assessing risks in the portfolio on a company-by-company basis and have made some changes as a result. We remain highly confident that we can continue to deliver attractive dividend income from a diversified portfolio of high-quality equities.

On July 25, 2019, the Manager announced that effective March 31, 2020, Ernst & Young LLP replaced PricewaterhouseCoopers LLP as the auditor to the Fund.

Effective after the close of business on August 2, 2019, the classes of the Fund that were eligible for CI Preferred Pricing Program (CIPP) transitioned from a tiered pricing model to a fee distribution model. Please refer to most recent simplified prospectus for further details.

Effective August 15, 2019 and April 3, 2020, respectively, John Reucassel and Stuart Hensman resigned as members of the Independent Review Committee (IRC) of CI Funds and effective September 19, 2019 and April 3, 2020, respectively, James McPhedran and Donna Toth were appointed as members of the IRC.

Independent Review Committee

The Fund has standing instructions from the Fund's IRC with respect to the following related party transactions:

- a) trades in securities of CI Financial Corp.; and
- b) purchases or sales of securities of an issuer from or to another investment fund managed by the Manager.

The applicable standing instructions require, amongst others, that related party transactions be conducted in accordance with the Manager's policies and procedures and applicable law and that the Manager advise the IRC of any material breach of such policies. The standing instructions also require that investment decisions in respect of related party transactions (a) are free from any influence by an entity related to the Manager and without taking into account any consideration relevant to an entity related to the Manager; (b) represent the business judgment of the Manager uninfluenced by considerations other than the best interests of the Fund; (c) are made in compliance with the Manager's policies and procedures; and (d) achieve a fair and reasonable result for the Fund. Transactions made by the Manager under the standing instructions are subsequently reviewed by the IRC on a quarterly basis to monitor compliance.

The Fund relied on the IRC's standing instructions regarding related party transactions during this reporting year.

Except as otherwise noted above, the Fund was not a party to any related party transactions during the year ended March 31, 2020.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Net assets per unit and distributions per unit are based on the actual number of units outstanding for the relevant class at the relevant time. The increase (decrease) in net assets from operations per unit is based on the weighted average number of units outstanding for the relevant class over the fiscal year.

(3) Distributions are automatically reinvested in additional units of the Fund.

(4) This information is provided for the years ended March 31.

[^]Effective after the close of business on August 2, 2019, the classes of the Fund that were eligible for CI Preferred Pricing Program (CIPP) transitioned from a tiered pricing model to a fee distribution model. Please refer to most recent simplified prospectus for further details.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal year. The higher a Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the year.

(5) This information is provided for the years ended March 31.

[^]Effective after the close of business on August 2, 2019, the classes of the Fund that were eligible for CI Preferred Pricing Program (CIPP) transitioned from a tiered pricing model to a fee distribution model. Please refer to most recent simplified prospectus for further details.

CI Global High Dividend Advantage Fund

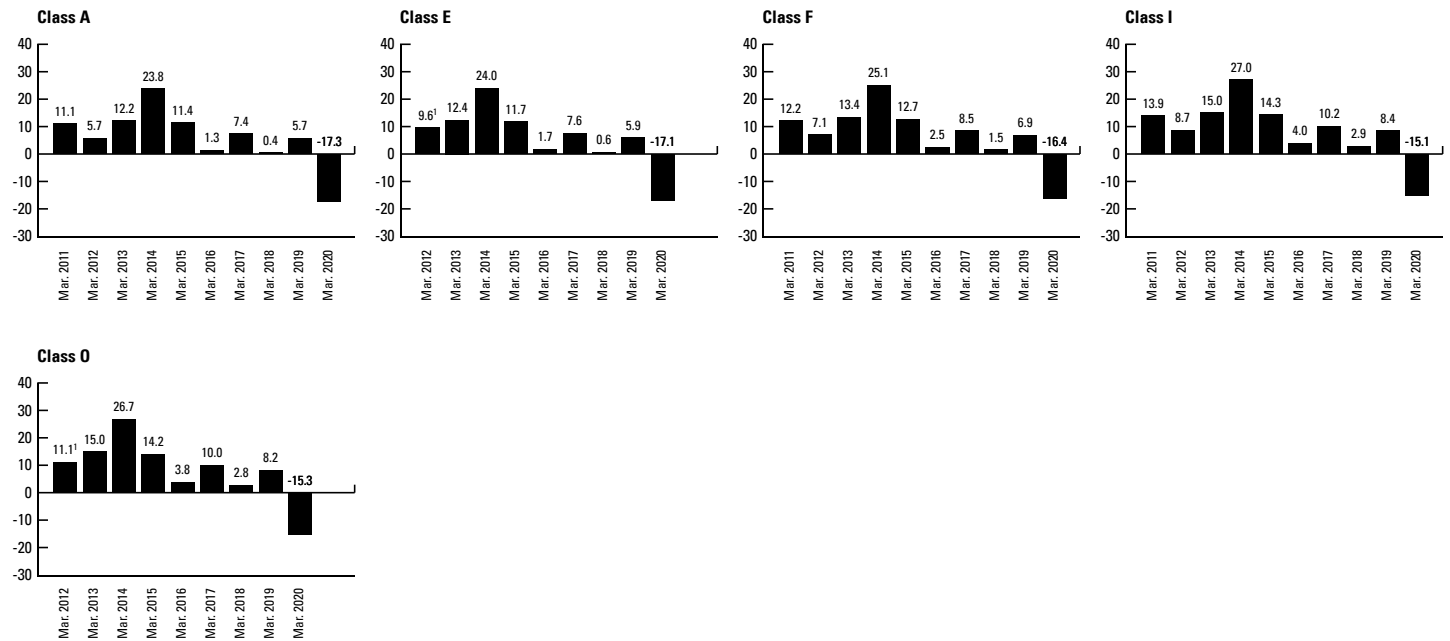

Management Report of Fund Performance for the year ended March 31, 2020

PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the years shown were reinvested in additional units of the relevant classes of the Fund. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

Year-by-Year Returns

The following charts show the Fund's annual performance for each of the years shown and illustrate how the Fund's performance has changed from year to year. In percentage terms, the charts show how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year, except where noted.

¹ 2012 return is for the period from October 4, 2011 to March 31, 2012.
