RESULTS OF OPERATIONS

The Fund's net assets decreased by \$24.5 million to \$78.1 million from March 31, 2020 to September 30, 2020. The Fund had net redemptions of \$40.2 million during the period. The portfolio's performance increased assets by \$15.7 million. Series A units returned 21.8% after fees and expenses for the six-month period ended September 30, 2020. Over the same time period, the Fund's benchmark returned 22.2%. The benchmark is the MSCI World Total Return Index (the Benchmark).

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

Global equities performed well over the six-month period, given the sharp recovery after the COVID-19 downturn.

In U.S.-dollar terms, global stocks (as defined by the MSCI ACWI Index) returned 28.9%. Markets were supported by accommodative monetary and fiscal policy, signs of improving economic data, and positive news on therapeutic treatments and vaccine progress.

Investors continued to lean towards what has worked, favouring familiar high-valuation momentum and growth stocks. Despite rising trade tensions, China and the United States, led by large-cap technology and e-commerce stocks, were among the best-performing markets. The United Kingdom, which has been hampered by Brexit uncertainty, was among the laggards.

The Fund performed well on an absolute and relative basis during the six-month period, but slightly underperformed its benchmark.

From a sector perspective, strong stock selection in industrials and financials more than offset weakness in the information technology, communication services and consumer discretionary sectors.

From a stock perspective, top contributors included Wienerberger AG, Weir Group PLC, Schneider Electric S.E., Makita Corp. and Alibaba Group Holding Ltd. Notable detractors included Galp Energia S.A., Fomento Económico Mexicano S.A.B. de C.V., Thule Group AB, GlaxoSmithKline PLC and Asics Corp.

Three new positions were initiated in the Fund during the period: BorgWarner Inc., Bureau Veritas S.A. and Nice Ltd. There were three outright sales: Asics Corp., FTI Consulting Inc. and Thule Group AB.

The Fund sold its position in the U.S.-traded Alibaba Group Holding Ltd. ADR and purchased the local Hong Kong listing. This was due to increased U.S.-China tensions, which have put U.S.-listed Chinese firms under increased scrutiny, along with the risk of a forced delisting.

RECENT DEVELOPMENTS

We buy companies based on their underlying fundamentals and focus on businesses that are inexpensive relative to their long-term cash flows. This approach has lagged in a narrowly led market, and the pandemic has only compounded this trend. These are extraordinary times, and while near-term performance has not kept up with the market, we believe that given our time horizon, our portfolio of winning businesses will ultimately demonstrate their value.

We believe that whatever shape the post-pandemic recovery follows, it will favour a broader rally in stocks and help to rebalance equity markets that have become heavily tilted towards large-cap growth and momentum stocks.

Effective April 3, 2020, Stuart Hensman resigned as a member of the Independent Review Committee (IRC) of CI Funds and effective April 3, 2020, Donna Toth was appointed as a member of the IRC.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period.

(5) This information is provided for the period ended September 30, 2020 and the years ended March 31.
