**What does the fund invest in?**

Sentry Corporate Bond Class's investment objective is to provide investors with a return that is similar to the return of Sentry Corporate Bond Fund, or another North American and/or international bond fund managed by us (the "Reference Fund"). The investment objective of the Reference Fund is to provide investors with income and the potential for long-term capital appreciation by investing in a portfolio consisting primarily of North American and/or international investment grade and non-investment grade corporate bonds and may also invest in real-return bonds, preferred shares, convertible securities or other fixed-income securities. The fund purchases primarily Canadian equity securities which it sells forward under a series of forward contracts in order to provide the fund with a return that is based on the performance of the Reference Fund. In addition, or in the alternative, the fund may invest directly in fixed-income securities similar to those held by the Reference Fund.

**How risky is it?**

The value of the fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

**Risk Rating**

CI Investments Inc. has rated the volatility of this fund as **low**.

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the fund's returns, see the "What are the risks of investing in this Fund?" section of the fund's simplified prospectus.

**No guarantees**

Like most mutual funds, this fund doesn't have any guarantees. You may not get back the money you invest.

### A word about tax

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan such as a Registered Retirement Savings Plan, or a Tax-Free Savings Account. Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.
