## How risky is it?

The value of the fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

## Risk rating

CI Investments Inc. has rated the volatility of this fund as **low**.

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the fund's returns, see the "What is a Mutual Fund and What are the Risks of Investing in a Mutual Fund?" section of the fund's simplified prospectus.

## No guarantees

Like most mutual funds, this fund doesn't have any guarantees. You may not get back the amount of money you invest.

## How has the fund performed?

This section tells you how Class A securities of the fund have performed over the past 10 calendar years. Returns are after expenses have been deducted. These expenses reduce the fund's returns.

Returns of Class A1, A2, A3, A4 and A5 securities would be similar to Class A securities, but would vary as a result of the difference in the combined management and administration fees compared to Class A as set out in the fee decrease table under "Fund Expenses".

## Year-by-year returns

This chart shows how Class A securities of the fund performed in each of the past 10 calendar years. This fund class dropped in value in 1 of the last 10 calendar years. The range of returns and change from year to year can help you assess how risky the fund has been in the past. It does not tell you how the fund will perform in the future.

## Best and worst 3-month returns

This table shows the best and worst returns for Class A securities of the fund in a 3-month period over the past 10 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
<b>Best return</b>	6.2%	January 31, 2015	Your investment would be \$1,062.
<b>Worst return</b>	-3.7%	December 31, 2016	Your investment would be \$963.

## Average return

The annual compounded return of Class A securities of the fund was 2.9% over the past 10 years. If you had invested \$1,000 in the fund 10 years ago, your investment would now be worth \$1,337.

## Who is this fund for?

### This fund may be suitable for you if you:

- want to receive income
- are investing for the short and/or medium term
- can tolerate low risk
- are looking to benefit from fee discounts based on the amount of your investment

## A word about tax

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws of where you live and whether you hold the fund in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

## How much does it cost?

The following tables show the fees and expenses you could pay to buy, own and sell Class A, A1, A2, A3, A4 and A5 securities of the fund. The fees and expenses — including any commissions — can vary among classes of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

CI Preferred Pricing offers separate classes of securities that charge progressively lower combined management and administration fees compared to Class A securities. If you hold Class A securities under the initial sales charge option and become eligible to hold Class A1, A2, A3, A4 or A5 securities under CI Preferred Pricing by meeting the applicable investment threshold, we will automatically switch your Class A securities into Class A1, A2, A3, A4 or A5 securities, as applicable, which have lower combined management and administration fees than Class A securities. Your account will be monitored and your securities will be automatically switched to the appropriate class of securities under CI Preferred Pricing with the lowest combined management and administration fees for which you are eligible. If you no longer meet the requirements to be eligible for a particular class of securities under CI Preferred Pricing, we will automatically switch your securities into the appropriate class under CI Preferred Pricing, which will have higher combined management and administration fees that will not exceed the Class A combined management and administration fees. See the fee decrease table under “Fund expenses” below and “Fees and Expenses” in the fund’s simplified prospectus. If you purchase Class A securities under either the standard deferred sales charge option, intermediate deferred sales charge option or the low-load sales charge option, those Class A securities will be converted into the initial sales charge option after the expiry of the sales charge schedule provided you qualify for CI Preferred Pricing, and such securities will participate in CI Preferred Pricing. Speak to your representative for eligibility requirements for CI Preferred Pricing, its availability with your representative’s firm and other details.

## 1. Sales charges

You may have to choose a sales charge option when you buy Class A, A1, A2, A3, A4 and A5 securities of the fund. Ask about pros and cons of each option.

## 2. Fund expenses

You don't pay these expenses directly. They affect you because they reduce the return you get on your investment.

Class A has the highest combined management and administration fees among these classes participating in CI Preferred Pricing. As of March 31, 2018, the fund expenses were as follows:

	Annual rate (as a % of the fund class' value)					
	Class A	Class A1	Class A2	Class A3	Class A4	Class A5
<b>Management expense ratio (MER)</b> This is the total of the fund class' management fee (which includes the trailing commission), administration fee, and other expenses.	1.69%	1.35%	1.34%	1.29%	1.26%	1.11%
<b>Trading expense ratio (TER)</b> These are the fund class' trading costs.	0.00%	0.00%	0.00%	0.00%	0.00%	0.00%
<b>Fund expenses</b>	1.69%	1.35%	1.34%	1.29%	1.26%	1.11%
<b>For every \$1,000 invested, this equals:</b>	\$16.90	\$13.50	\$13.40	\$12.90	\$12.60	\$11.10

## Preferred Pricing Program - Fee Decrease Table

The combined management and administration fee decrease between Class A and each of Class A1, A2, A3, A4 and A5 is set out in the table below:

Tiers	Class	Combined management and administration fee decrease (from Class A) (%)
Up to \$149,999.99*	A	N/A
\$150,000-\$499,999.99*	A1	0.050%
\$500,000-\$999,999.99	A2	0.060%
\$1,000,000-\$2,499,999.99	A3	0.130%
\$2,500,000-\$4,999,999.99	A4	0.170%
\$5,000,000 and above	A5	0.240%

\*Effective on or about October 1, 2018, the minimum investment amount for Class A1 will be reduced to \$100,000.

## More about trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the fund. It is for the services and/or advice that your representative and their firm provide to you.

CI Investments Inc. pays the trailing commission to your representative's firm. It is paid from the fund's management fee and is based on the value of your investment. The rate depends on the sales charge option you choose.

Sales charge option	Amount of trailing commission	
	in percent (%)	in dollars (\$)
<b>Initial sales charge</b>	0% to 0.50% of the value of your investment each year	\$0 to \$5.00 each year on every \$1,000 invested
<b>Standard deferred sales charges</b>	0% to 0.25% of the value of your investment each year	\$0 to \$2.50 each year on every \$1,000 invested
<b>Intermediate deferred sales charges</b>	0% to 0.65% of the value of your investment each year	\$0 to \$6.50 each year on every \$1,000 invested
<b>Low-load sales charges</b>	0% to 0.25% of the value of your investment each year	\$0 to \$2.50 each year on every \$1,000 invested

The standard and intermediate deferred sales charge trailing commission rates, and the low-load sales charge trailing commission rate, each change to the initial sales charge trailing commission rate upon completion of your deferred sales charge schedule.

## 3. Other fees

You may have to pay other fees when you buy, hold, sell or switch securities of the fund.

Fee	What you pay
<b>Short-term trading fee</b>	Up to 2% of the net asset value of the securities you redeem, if we determine that you have engaged in inappropriate short-term trading, which may occur if you sell or transfer your securities within 30 days of buying them. This fee goes to the fund.
<b>Transfer fee</b>	Your representative's firm may charge you up to 2% of the net asset value of securities you switch to another fund.
<b>Program minimum fee</b>	If you participate in one of our managed programs, we may charge you an annual fee of up to 0.15% of the net asset value in the fund within the program, payable to us quarterly by the redemption of securities (without charges), if your investment is less than the program minimum.
<b>Reclassification fee</b>	If you are switching Class A, AT5, AT6, AT8, U, UT6 or Z securities to a different class of securities of the same fund, you may have to pay to us a reclassification fee if you bought your securities under a deferred sales charge option. This fee is equal to the sales charge you would pay if you sold such securities.
<b>NSF cheque fee</b>	There is a \$25 charge for all cheques returned because of insufficient funds.

## What if I change my mind?

Under securities law in some provinces and territories, you have the right to:

- withdraw from an agreement to buy mutual funds securities within two business days after you receive a simplified prospectus or Fund Facts document, or
- cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the simplified prospectus, annual information form, Fund Facts document or financial statements contain a misrepresentation. You must act within the limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.
