

FUND OVERVIEW

The fund seeks to provide unitholders with guaranteed, sustainable cash flow throughout their retirement years while providing opportunity for capital appreciation. During the initial 5 year accumulation phase and the 20 year distribution phase, the fund will invest in units of underlying funds, exchange traded funds, cash equivalents as well as derivative instruments in the risk management overlay strategy (together, the "Active Portfolio"). If the fund assets shift to the protection portfolio, the fund will invest in fixed income securities issued by the Canadian federal and/or provincial governments and cash equivalents (together, the "Protection Portfolio"). A shift of all fund assets into the Protection Portfolio would only occur as a result of a significant decline in interest rates, fund performance, or both during the term of the fund.

FUND DETAILS

Inception date	May 2014
Total net assets (\$CAD) As at 2020-08-31	\$18.3 million
NAVPS As at 2020-09-21	\$10.4151
MER (%) As at 2020-03-31	3.00
Management fee (%)	1.90
Asset class	Asset Allocation
Currency	CAD
Minimum investment	\$500 initial / \$25 additional
Issue Period	May 9, 2014 to June 30, 2014
Accumulation Phase	July 2, 2014 to June 30, 2019
Distribution Phase	July 2, 2019 to June 30, 2039
Target End Date	July 2, 2039
Distribution frequency	Monthly
Last distribution	\$0.0455

Over 35,000 financial advisors have chosen CI Investments as a partner. We believe that Canadians have the best opportunity for investment success by using the services of a professional financial advisor. [Learn more at ci.com](https://www.ci.com).

¹ Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns net of fees and expenses payable by the fund (except for figures of one year or less, which are simple total returns) including changes in security value and reinvestment of all dividends/distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently, and past performance may not be repeated.

² The risk level of a fund has been determined in accordance with a standardized risk classification methodology in National Instrument 81-102, that is based on the fund's historical volatility as measured by the 10-year standard deviation of the fund's returns. Where a fund has offered securities to the public for less than 10 years, the standardized methodology requires that the standard deviation of a reference mutual fund or index that reasonably approximates the fund's standard deviation be used to determine the fund's risk rating. Please note that historical performance may not be indicative of future returns and a fund's historical volatility may not be indicative of future volatility.

³ Please refer to the fund's simplified prospectus for distribution information.

⁵ Portfolio allocations will fluctuate over the life of the mutual fund as the portfolio holdings and market value of each security changes. The portfolio manager(s) may change the portfolio allocations in some or all of the sectors.

The contents are not to be used or construed as investment advice or as an endorsement or recommendation of any entity of security discussed.

Certain statements contained in this communication are based in whole or in part on information provided by third parties and CI has taken reasonable steps to ensure their accuracy.

The rates of return are used only to illustrate the effects of the compound growth rate and are not intended to reflect future values or returns on investment in an investment fund.

The "Growth of \$10,000" chart shows the final value of a hypothetical \$10,000 investment in securities in this class of the fund as at the end of the investment period indicated and is not intended to reflect future values or returns on investment in such securities.

Management Expense Ratio ("MER") represents the trailing 12-month management expense ratio, which reflects the cost of running the fund, inclusive of applicable taxes including HST, GST and QST (excluding commissions and other portfolio transaction costs) as a percentage of daily average net asset value the period, including the fund's proportionate share of any underlying fund(s) expenses, if applicable. The MER is reported in each fund's Management Report of Fund Performance ("MRFP"). MRFPs can be found within the Documents tab on [ci.com](https://www.ci.com).
