

FUND OVERVIEW

The fund seeks to provide unitholders with guaranteed, sustainable cash flow throughout their retirement years while providing opportunity for capital appreciation. During the 20 year distribution phase, the fund will invest in units of underlying funds, exchange traded funds, equity and fixed income securities, cash equivalents as well as derivative instruments in the risk management overlay strategy (together, the "Active Portfolio"). If the fund assets shift to the protection portfolio, the fund will invest in fixed income securities issued by the Canadian federal and/or provincial governments and cash equivalents (together, the "Protection Portfolio"). A shift of all fund assets into the Protection Portfolio would only occur as a result of a significant decline in interest rates, fund performance, or both during the term of the fund. See the Guarantees section below for further information on the guarantee provided by the Bank of Montreal.

FUND DETAILS

Inception date	January 2015
Total net assets (\$CAD) As at 2019-08-31	\$29.7 million

CI Multi Asset Management is a division of CI Investments Inc, a subsidiary of CI Financial Corp.

Alfred Lam

Over 35,000 financial advisors have chosen CI Investments as a partner. We believe that Canadians have the best opportunity for investments success by using the services of a professional financial advisor. [Learn more at ci.com](http://ci.com).

¹ Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns (net of fees and expenses payable by the fund) including changes in security value and reinvestment of all dividends/distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently, and past performance may not be repeated.

² Portfolio allocations will fluctuate over the life of the mutual fund as the portfolio holdings and market value of each security changes. The portfolio manager(s) may change the portfolio allocations in some or all of the sectors.

³ The risk level of a fund has been determined in accordance with a standardized risk classification methodology in National Instrument 81-102, that is based on the fund's historical volatility as measured by the 10-year standard deviation of the fund's returns. Where a fund has offered securities to the public for less than 10 years, the standardized methodology requires that the standard deviation of a reference mutual fund or index that reasonably approximates the fund's standard deviation be used to determine the fund's risk rating. Please note that historical performance may not be indicative of future returns and a fund's historical volatility may not be indicative of future volatility.
